PET FOAM T90

DATA SHEET

The Fire Resistant Structural Foam

DESCRIPTION

PET FOAM T90 is a closed-cell, thermoplastic and recyclable polymer foam with excellent fire, smoke & toxicity (FST) properties.

It has very good mechanical properties and an extraordinary resistance to fatigue, is chemically stable, UV-resistant and has negligible water absorption. It is thermally stable during high temperature processing and post curing. PET FOAM T90 is designed for easy use with all resin systems and processing technologies.

PET FOAM T90 is the ideal core material for structural sandwich applications requiring high fire resistance.

CHARACTERISTICS

- Superior fire resistance (FAR 25.853; NF 16-101; DIN 5510)
- Outstanding fatigue strength
- Excellent long term thermal stability up to 100 °C (212 °F)
- Best thermal stability in process up to 150 °C (302 °F)
- Good thermal insulation
- Highly consistent material properties
- Easy to process with all types of resin and lamination processes
- Good adhesion (skin-to-core bond)
- Very high chemical stability
- No water absorption, no after-expansion, no outgassing

APPLICATIONS

- Road and Rail: Floors, sidewalls, front ends, interiors, roofs, engine covers
- Marine: Decks, interiors, superstructures
- Industrial: Covers, containers, x-ray tables, sporting goods
- Architecture and Construction: Roofs, claddings, domes, portable building

PROCESSING

- Contact molding (hand/spray)
- Vacuum infusion
- Resin infusion / injection (VARTM / RTM)
- Adhesive bonding
- Pre-preg processing
- Compression molding (GMT, SMC)
- Thermoforming
